Cable Technology Wins Lockheed Martin STAR Supplier Award

Minneapolis, MN --- September 8, 2009 --- Lockheed Martin Corporation (LM) has recognized Cable Technology with the corporation's elite STAR Supplier Award. The STAR Supplier Award is considered to be one of the industry's top awards and as such, is one of the most coveted. Lockheed Senior Executives hosted the Cable Technology management team at an awards ceremony held in Minneapolis this month and recognized the Great Falls, Montana based company as one of Lockheed Martin's top-performing suppliers.

The prestigious award is given only to Lockheed Martin suppliers who distinguish themselves in meeting some of the most stringent performance criteria in the military and aerospace industries. Lockheed Martin STAR Suppliers are provided visibility across the entire Lockheed Martin Corporation, which results in increased business opportunities and national visibility.

Cable Technology President, Ed Buttrey, issued the statement: "We are thrilled to be even considered for such an honor by Lockheed. Actually winning this award is unbelievable and is a tribute to the caliber, determination and quality of the employees and leadership at CTI. In a time when we are working to win F-35 and other key program work with Lockheed Martin, the award could not be more exciting. We now need to take every advantage of this opportunity to get into as many programs as possible throughout Lockheed."

Founded in 1997 by former Boeing weapon system engineer Ed Buttrey, Cable Technology has grown to become an industry leader in the manufacturing and support for electrical products to support the aviation and military industries. Expanded into beautiful Great Falls, Montana, in 2006, our headquarters is a state-of-the-art, 37,000 square foot facility. Cable Technology qualifies as a Small Disadvantaged HubZone business and supports such programs as the E-3 AWACS, P-8A Poseidon, Littoral Combat Ship, Vehicle Combat System, F16 and Bradley Tank.
